

S3 Service

Create S3 bucket | S3 | Global

https://s3.console.aws.amazon.com/s3/bucket/create?region=us-east-1&bucketType=general

General configuration

AWS Region: US East (N. Virginia) us-east-1

Bucket type: **General purpose** (Info)
Recommended for most use cases and access patterns. General purpose buckets are the original S3 bucket type. They allow a mix of storage classes that redundantly store objects across multiple Availability Zones.

☐ Directory - New
Recommended for low-latency use cases. These buckets use only the S3 Express One Zone storage class, which provides faster processing of data within a single Availability Zone.

Bucket name: **sarubucket** (Info)
Bucket name must be unique within the global namespace and follow the bucket naming rules. [See rules for bucket naming](#)

Copy settings from existing bucket - optional
Only the bucket settings in the following configuration are copied.
Choose bucket
Format: s3://bucket/prefix

Object Ownership
